|               |                                                                                                                                                                                                                                                                                                  |                   |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| PROFILE       | I work across products, developer tools, and the communities around them. At MegaETH, that meant explaining the technology, supporting the ecosystem, and contributing practical tools and documentation. My background includes more than a decade building and integrating healthcare systems. |                   |
| EXPERIENCE    | <b>MegaETH</b>                                                                                                                                                                                                                                                                                   | 2024–2026         |
|               | Head of Ecosystem; previously Head of Community.                                                                                                                                                                                                                                                 |                   |
|               | Worked across community and ecosystem development, technical communication, and developer guidance. Selected public contributions are linked below.                                                                                                                                              |                   |
|               | <b>Helseplattformen</b>                                                                                                                                                                                                                                                                          | Sep 2019–Nov 2023 |
